## FUEL PUMP REWIRE INSTRUCTIONS

### Tools Needed:

Phillips/Flathead screw driver  
10mm & 8mm socket and wrench  
Wire strippers/crimpers  
Needle nose pliers

Fuse box: First begin with removing the ground terminal on the battery with a 8mm socket. And then there are 4 clips that hold the fuse box down, unclip each one and pull the fuse box forward. Locate the grey wire that is the wire that is the output of the fuel pump resistor (see below). Cut that wire a few inches out of the plug and crimp the supplied butt splice to connect the wire that is coming out of the fuse box to the long blue wire that comes with the kit. Run the rest of that wire through the firewall and into the passenger compartment on the passenger side.

Running wire: Open the passenger door, use the Phillips screw driver to loosen the 4 screws that hold the carpet trim down.

Remove the trim and pull the carpet back an inch or two. Run the blue wire that is coming through the firewall under the carpet towards the back seat. Remove the lower part of the rear seat by pulling the two clips under the front. Slide the wire underneath the rubber insulation toward the fuel pump trap door. The fuel pump door is located behind the flip down part of the upper rear seat.

Remove the seven 10mm sheet metal nuts with a 10mm socket, you can use a flat head screw driver to pull up on the fuel pump door.

Plug harness: Once it is removed, unplug the factory fuel pump plug and plug the supplied unit in line with the stock plug. Strip the blue wire that you ran toward the back and crimp that wire into the butt splice on the plug harness. Ground strap: Loosen the 18mm nut on the rear seat belt stud, place ring terminal on then retighten. Use a pair of pliers to pry up on the lip of the fuel door, so that when it is bolted back down that it wont cut into the wire.

Finishing the install: Replace the fuel pump trap door by tightening the sheet metal nuts being careful to not strip them, Replace the lower part of the seat, and the carpet plastic trim piece.

Complete!
